Subject: Microsoft Settlement

I would like to state that as a firm supporter of open source and and gnu-gpl, I think that the settlement is not going to suffice. I would like to see microsoft hit hard for this, and I would like to see there tactics forced to change.

These guys are responsible for some of the nastiest business tactics known to man. And we let it slide.

Please do something to aid us in our fight to survice against the giant. Free open source.
